

PART 1

Zebra Blinds

Product Introduction | Zebra Blinds

Zebra Blinds

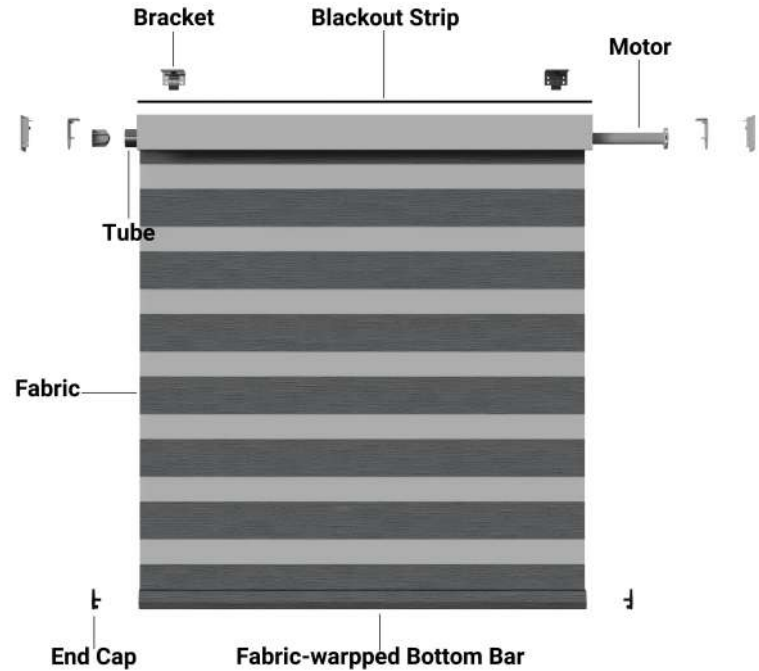

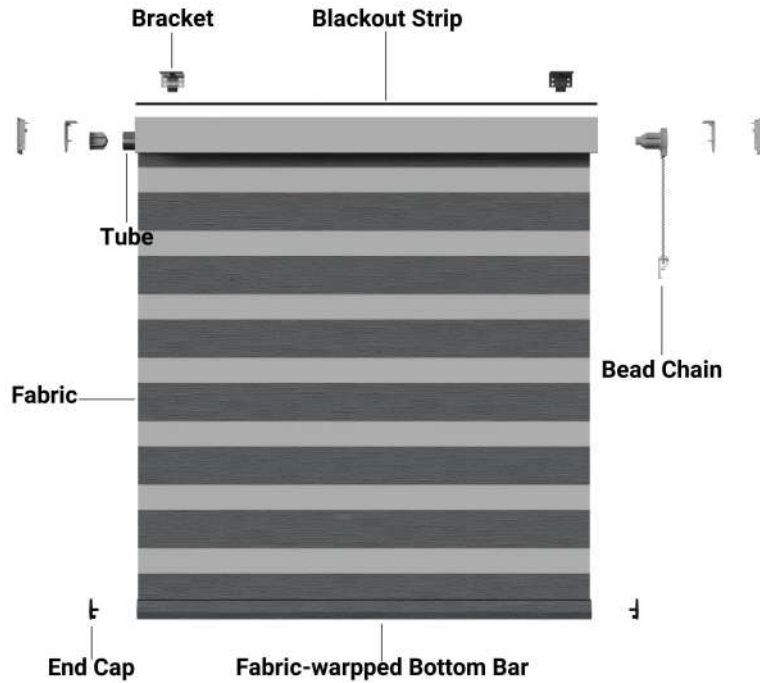

Zebra Blinds | also called rainbow blinds. It is composed of a double-layer fabric that combines one fabric and one yarn, and the dimming function is achieved by interlacing the front and back layers of the fabric.

When the gauzes overlapped, the line is softer, reducing direct light to a certain extent. When the gauze overlaps with the fabric, the light is blocked by the blinds fabric, thus achieving the effect of double-layer staggered dimming.

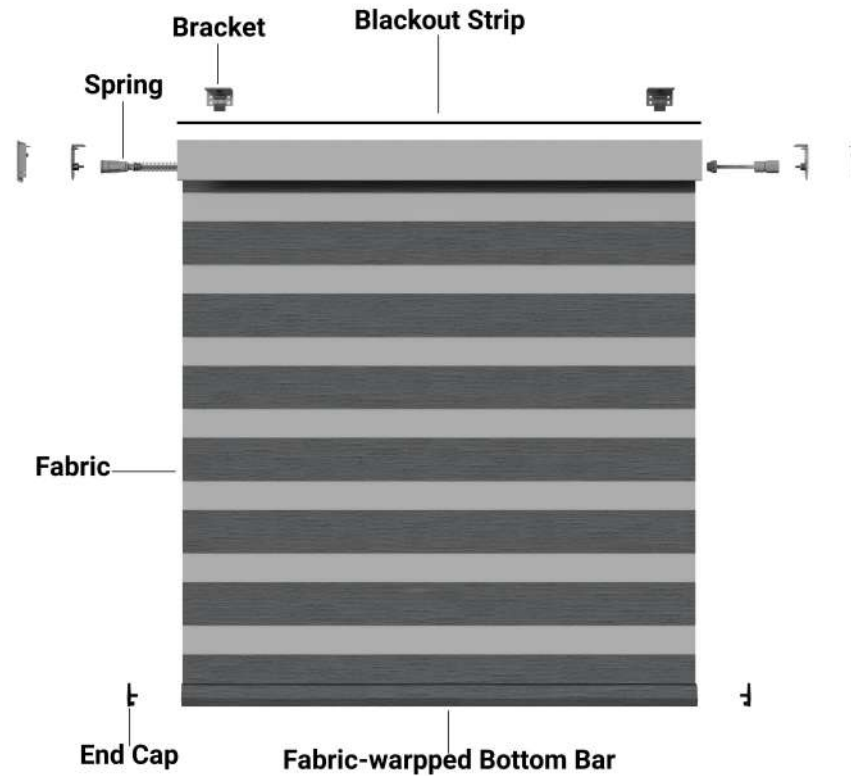

Zebra blinds combine the warmth of fabric, the simplicity of roller blinds, and the dimming function of venetian blind. Elegant and luxurious, regulating light, protecting privacy, shading and insulation, making it an ideal choice for office and home window decorations.

PART 2

Roller Blinds

Product Introduction | Roller Blinds

Roller Blinds

Roller Blinds is cost-effective, with strong functionality, and can be divided into full and semi-blackout fabrics.

Blackout Fabric

It can achieve 99.9% shading effect, which is not inferior to common shading blinds. It can not only prevent sunlight, but also perfectly guarantee indoor privacy, playing the role of shading, sunscreen and heat insulation.

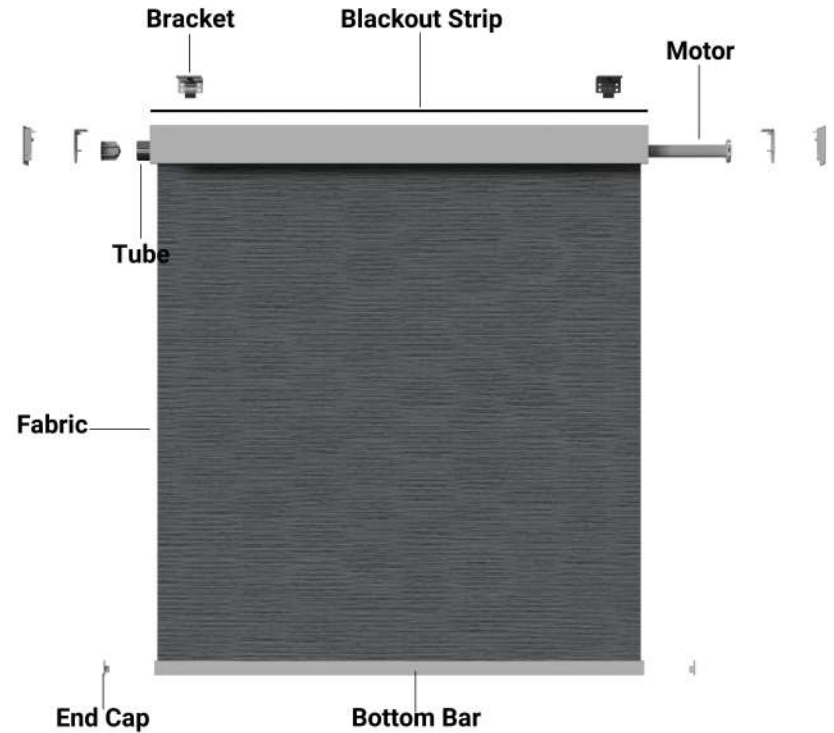

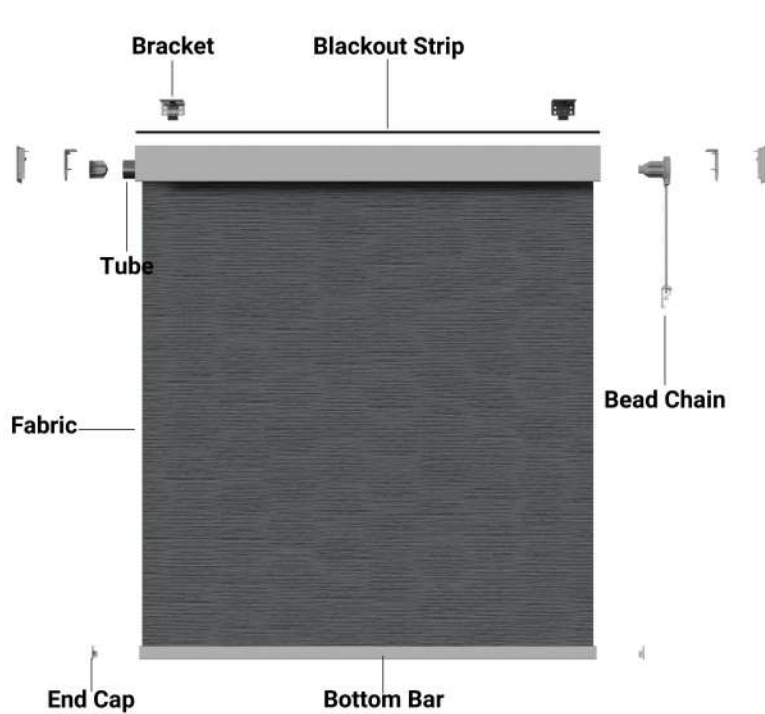

Semi-blackout

It can transmit light but not the scenery, adding a hazy beauty to the interior. It is generally used for windows that do not have direct light entering.

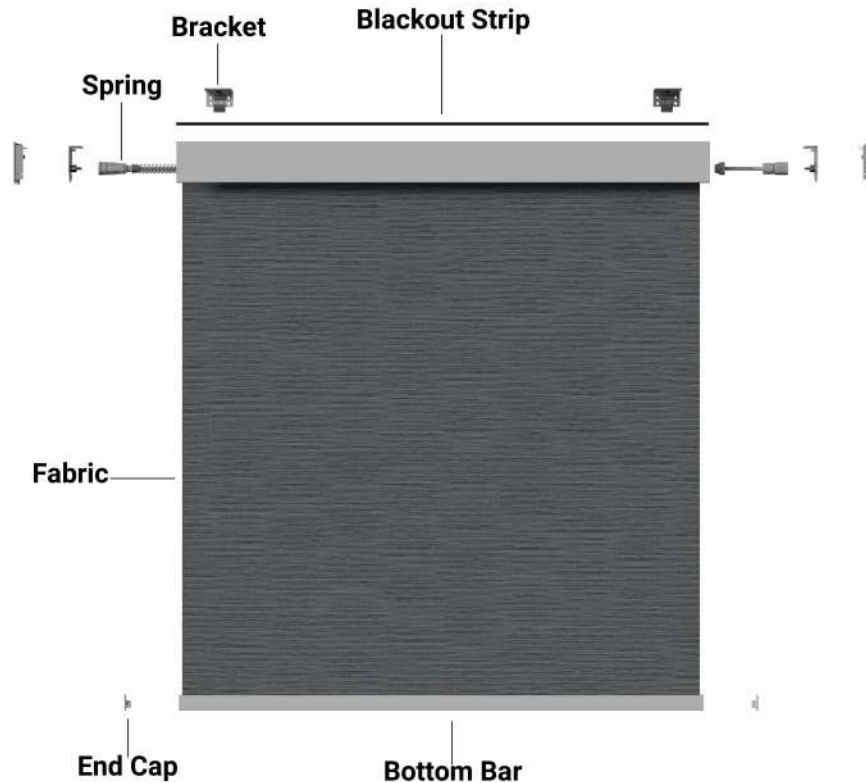

The roller blinds can be made-to-measure according to individual needs. Cordless, manual bead chain, electric, windproof, printed pictures and logo print service can also be customized.
